VILLAGE OF CENTRAL LAKE ORDAINS:

Section 1. Amendment of Chapter 9.

As used in this Chapter a “dangerous structure” means a building or structure that has one (1) or more of the following defects or is in one (1) or more of the following conditions:

- (a). A portion of the building or structure is damaged by fire, wind, flood, or other cause such that the structural strength or stability of the building or structure is appreciably less than it was before the catastrophe and does not meet the minimum requirements of the building code enforced within the Village for a new building or structure.
- (b). A part of the building or structure is likely to fall, become detached or dislodged, or collapse and injure persons or damaged property.
- (c). A portion of the building or structure has settled to such an extent that walls or other structural portions of the building or structure have materially less resistance to wind than is required in the case of new construction by the building code enforced within the Village.
- (d). The building or structure, or part of the building or structure, because of dilapidation, deterioration, decay, faulty construction, or the removal or movement of some portion of the ground necessary for the support, or for other reasons, is likely to partially or completely collapse, or some portion of the foundation or underpinning of the building or structure is likely to fall or give away.
- (e). The building, structure, or a part of the building or structure is manifestly unsafe for the purpose for which it is used.
- (f). The building or structure is damaged by fire, wind, or flood, or is dilapidated or deteriorated and has become an attractive nuisance to children who might play in the building or structure to their danger.

- (g). The building or structure is vacant, dilapidated, and opened at door or window, leaving the interior of the building exposed to the elements or accessible to entrance by trespassers.
- (h). A building or structure, or portion of a building or structure, above or below grade, which is not and cannot be used or occupied, either temporarily or permanently, as permitted under the building code for the State of Michigan, as amended, inclusive of all rules, codes and regulations pertaining thereto. 9.9 Abatement by Village.

If a Court of competent jurisdiction finds the owner or occupant of a building or structure in violation of this Chapter, the Court, in addition to ordering the owner or occupant to demolish the dangerous structure and remove it from the property or to repair the dangerous structure to make it safe, may authorize the Village to demolish the dangerous structure and remove it from the property or to repair the dangerous structure to make it safe. The Court, however, shall not authorize the Village to demolish the dangerous structure if the cost of repairing the building or structure to a safe condition is less than the state equalized value for the building or structure.

The lien shall not take effect until notice of the lien has been filed or recorded as provided by law. The lien provided for in this subsection does not have priority over previously filed or recorded liens and encumbrances. The lien for the costs shall
